

AI Workshop “Fundamentals”

Unlocking Growth for Entrepreneurs & Ministries

Welcome

Today is a hands-on workshop based on our **AI Playbook**.

- ✓ **Goal: Master the Core Tools.**
- ✓ **Format: Learn → Do → Review.**
- ✓ **Tool: Your Smartphone.**

Today's Roadmap

Foundations

- ✓ The Big 3: ChatGPT, Gemini, NotebookLM
- ✓ Guardrails
- ✓ Prompt Engineering

Application

- ✓ Visuals & Marketing
- ✓ Ministry & Ops Workflows

NotebookLM Deep Dive

- ✓ Sources
- ✓ Audio /Video Overviews
- ✓ Study Guides & Tools

After Class

You receive the full **AI Playbook v.5.**

Why AI? Why Now?

Adoption has moved from "hype" to "habit".

58%

Of small businesses use Generative AI daily to grow faster.

75%

Of knowledge workers say it saves them 5+ hours a week.

68%

Of Entrepreneurs say AI is critical for their productivity.

Business Owner Use in Nicaragua

 **Best 2025 Estimate (Evidence-Based Range)**

Estimated percentage of Nicaraguan business owners using AI in any form:

~8%–15%

This includes **any practical AI use**, such as:

 ChatGPT or Gemini for writing, planning, or marketing.

 AI features inside tools like **WhatsApp Business, Canva, Facebook Ads, or Google Workspace.**

 AI translation, image creation, or basic automation.

 **Important:** This is *not* advanced AI adoption—mostly **light, task-level usage.**

Ministry Use in Nicaragua

 **Best 2025 Estimate (Evidence-Based)**

Estimated % of Nicaraguan pastors / ministry leaders using AI in any form:

~4%–10%

This includes **light or indirect AI use**, such as:

 ChatGPT or Gemini for sermon outlines, devotionals, lesson ideas.

 AI-assisted translation (English ↔ Spanish).

 Canva AI for sermon slides or social posts.

 AI features embedded in Google Docs, Gmail, or Facebook tools.

 **This does not** mean strategic or ethical AI integration—mostly **experimental or convenience use**.

The Multiplier Effect

AI allows a team of 1 to operate like a team of 10.

- **Scale:** Handle more customers without burnout.
- **Clarity:** Turn messy thoughts into clear plans.
- **Reach:** Multilingual content instantly.

What Does God's Word Say About AI?

The Bible does not mention Artificial Intelligence directly. But Scripture gives clear principles for how humans should use tools, knowledge, and power.

Biblical Foundation

AI is human-made, not God-made

AI is a tool, not a moral or spiritual authority

Responsibility always remains with people before God

Key Scripture

**“Commit to the Lord
whatever you do, and He
will establish your plans.”
Proverbs 16:3**

Wisdom Comes from God, Not Machines

AI can process information, but wisdom and discernment come only from God.

What AI Can Do

- Analyze information
- Summarize content
- Suggest ideas

What AI Cannot Do

- Discern truth spiritually
- Replace prayer
- Provide moral authority

Key Scriptures

📖 "If any of you lacks wisdom, you should ask God..." — James 1:5

📖 "For the Lord gives wisdom; from His mouth come knowledge and understanding." Proverbs 2:6

Stewardship Applies to Digital Tools

God calls His people to steward everything entrusted to them, including technology.

Biblical Principles

Faithfulness in small things

Accountability in powerful tools

Integrity in use

Key Scriptures

"Whoever can be trusted with very little..." — Luke 16:10

*"It is required of stewards that they be found faithful."
— 1 Corinthians 4:2*

Knowledge Without Wisdom Is Dangerous

Scripture warns that knowledge alone can lead to pride or harm.

Biblical Warning

Information ≠
wisdom

Capability ≠
righteousness

Key Scriptures

"Knowledge puffs up, but love builds up." — 1 Corinthians 8:1

"Be careful that no one takes you captive..."
— Colossians 2:8

Discernment Is Required With All New Technology

New tools require **testing, wisdom, and restraint.**

Biblical Instruction

Test everything

Hold onto what is good

Reject what causes harm

Key Scriptures

"Test everything; hold fast what is good." — 1 Thessalonians 5:21

"Do not conform to the pattern of this world..."
— Romans 12:2

AI Must Not Replace Human Leadership or Care

Scripture affirms **human responsibility, counsel, and shepherding.**

Biblical Roles That AI Cannot Replace

Pastoral discernment

Human empathy

Accountability

Prayerful counsel

Key Scriptures

"Plans fail for lack of counsel..."
— Proverbs 15:22

"Shepherd the flock of God..."
— 1 Peter 5:2

Artificial Intelligence is a human-made tool that must remain under human authority, biblical wisdom, and ethical stewardship. It may assist learning and planning—but it must never replace discernment, prayer, or responsibility before God.

INTERACTIVE SESSION

House Rule #1: Phones Out!

Usually, we say put them away. Today, they are your tool.

Please check your WiFi connection now.

The Basics

Platforms, Settings, Prompts

Which Platform Should I Use?

There are many, but these 3 are essential for mobile users in Nicaragua.

ChatGPT (OpenAI)

The “Thinker”

Best for logic, writing, reasoning, and “Deep Research”.

Gemini (Google)

The “Connector”

Best for Google Integration, Visuals, and real-time info.

NotebookLM

The “Student”

Best for studying YOUR specific documents (PDFs, Bibles, Manuals).

What users get for free?

| | ChatGPT (GPT-5.2) Free | Gemini 3.0 Free (Gemini app) | NotebookLM Free |
|-------------------------------|---|--|---|
| Best for | General AI assistant | General AI assistant + Google | Learning from <i>your sources</i> |
| Workspace | Projects ✓ | “Canvas”/workspace tools ⚠ (varies) | Notebooks ✓ |
| Custom assistants | Use GPTs ✓ • Create GPTs ✗ | Gems ✓ | ✗ |
| Web + files | Web browsing ✓ • File uploads ✓ | Web tools ✓ • File uploads ✓ | Sources-only ✓ (no open web) |
| Image creation | ✓ (rate-limited) | ✓ (quota-limited) | ✗ |
| Audio / video | ✗ | ✓ (feature exists; quotas vary) | ✓ Audio/Video Overviews |
| Free limits (headline) | 10 msgs / 5 hrs on GPT-5.2 → then auto-switches to mini | “Basic access” (caps can change); limits shown per model tier | 50 chats/day • 3 audio/day • (also: 100 notebooks, 50 sources/notebook) |

ACTION ITEM

Let's Install / Verify

If you have low storage, just use the browser versions.

Important Settings

Gemini

ChatGPT

Private-by-Default: Your First 5 Minutes in AI

Why settings matter

Why settings matter

-  AI tools can save chat history, learn your preferences, and sometimes use chats to improve models.
-  New users should set **privacy** + **personalization** first, before doing real work.
-  Best Practice: **Private by default** + **least privilege** + **human review before publishing**.

The 4 Toggles Every New User Must Know

1) Training / Model improvement

- Controls whether chats may be used to improve models (consumer accounts).

2) Chat History / Activity

- Controls whether your chats are saved in your account history/activity.

3) Memory / Past-chat personalization

- Controls whether the assistant “remembers” preferences or uses past chats to tailor responses.

4) Temporary / Incognito chat

- One-off mode for sensitive topics: minimal saving, no personalization effects.

On-screen mini diagram

- Sensitive? → Temporary Chat
- Not sensitive? → Normal Chat + (optional) personalization

Temporary Chat

Normal Chat +
(optional) personalization

ChatGPT: Privacy Settings (Do This First)

A) Turn OFF training

- Path: **Profile** → **Settings** → **Data Controls**
- Toggle: “Improve the model for everyone” →  OFF

B) Use Temporary Chat for sensitive work

- Use for: donor info, finances, HR issues, counseling topics, internal strategy.

C) Account security

- Turn on **2-step verification / MFA** (where available).

If it's sensitive, use **Temporary Chat**.

Gemini: Privacy Settings (Do This First)

A) Turn OFF “Gemini Apps Activity / Keep Activity”

- Path (common): **Profile** → **Gemini Apps Activity (Keep Activity)** → **Turn off**
- Result: prevents long-term saving in activity and reduces training/review use.

B) Use Temporary Chat for sensitive work

- Temporary Chats:
 - Don't appear in recent chats or activity
 - Not used to personalize or train
 - Kept briefly (Google states up to ~72 hours for service/safety)

C) Account security

-  Enable Google **2-step verification**.

Gemini: Personalization Settings (Recommended Defaults)

A) Past-chat personalization

- **Keep OFF** by default (especially ministry settings).
- Use **Temporary Chat** when you don't want the conversation to influence future chats.

B) Connected apps / "personal intelligence"

- Default: **OFF**
- If needed later: Connect only what you need.
-  Prefer **"AI-safe" folders** (no donor lists, counseling notes, HR files).
- **Disconnect** when done (least privilege).

C) Audio / Live improvements

- Leave **OFF** unless you explicitly want to opt in.

The “Do Not Paste” List (Works for Both Platforms)

Never paste:

- ✗ Passwords, banking details, private donor exports
- ✗ Student personal data (IDs, addresses)
- ✗ Counseling notes or medical information
- ✗ Internal security details (keys, access codes)

Instead:

- ✓ **Anonymize:** replace names with roles (Donor A, Student 1)
- ✓ **Summarize:** “We have 120 donors, segmented by...”
- ✓ Use secure internal systems for raw data

**“If a human shouldn’t see it,
don’t paste it.”**

ChatGPT & Gemini Features

Unlocking powerful tools for work and life.

ChatGPT

Gemini

The Core Skill: Prompting

The AI is only as good as your instructions.

Bad Prompt

Write a proposal.

Good Prompt

Act as a consultant.

Write a 1-page
proposal for a cleaning
service in Managua.

Tone: Professional.

Role:
Who is the AI?

Task:
What exactly
do you need?

Context:
What is the
situation?

Constraints:
Length, Tone.

**The 4-Part
Formula**

Your Identity Prompt

Open ChatGPT
or Gemini.

Wait for the AI
to confirm.

Type this:

"I run a [Type of Business/Ministry] in
[City, Nicaragua]. My goal is [Goal].
My audience is [Audience]. Remember this
context."

AI Confirms

Pro Prompting (use AI to write your prompt)

Paste this into ChatGPT or Gemini:

“Turn my request into a pro prompt using 3 blocks: (1) **System** (role/mission/constraints + ‘assumptions in [brackets]’) (2) **Task spec** (deliverable, audience, section order, bullet/word caps, reading level, style rules), (3) **Inputs** (a place for me to paste notes). Ask me ONLY for the missing details needed to lock format and constraints.”

1. System

role/mission/constraints +
'assumptions in [brackets]'

2. Task spec

deliverable, audience,
section order...

3. Inputs

a place for me to
paste notes

The First Task

Option A (Business):

"Draft a WhatsApp welcome message for a new customer. Keep it friendly, use emojis, and include a placeholder for my price list."

Option B (Ministry):

"Draft a 3-point outline for a 5-minute devotional on 'Hope in Hard Times' for a youth group."

It's a Conversation

Did the first draft look perfect? Probably not. **Iterate.**

Make it Shorter

That is too long for WhatsApp. Cut it in half.

Change the Tone

It sounds too formal.
Make it warmer and more 'Nica'.

Add Format

Put the key points into a bulleted list.

Don't Type. Talk.

Typing on a phone is slow. Use "Voice Mode".

- Brainstorm while driving.
- Roleplay difficult conversations.

Top AI Use Cases for Business

1 Marketing & Sales (Most Common)

Tools: Gemini, ChatGPT, Canva AI, Facebook/Instagram tools, Notebook LM

Used for:

- Writing Facebook & WhatsApp sales messages.
- Creating flyers, posters, menu images.
- Improving product descriptions.
- Translating content (Spanish ↔ English)

Example (Micro-Business):

A food vendor uses ChatGPT to rewrite a Facebook post promoting weekend specials → more engagement, same product.

2

Customer Communication (Quiet but Powerful)

Tools:

WhatsApp
Business

OpenAI
ChatGPT

Google
Gemini

Used for:

Auto-reply
drafts.

Polite responses
to complaints.

Appointment
reminders.

FAQs

Example: Beauty Salon

A beauty salon drafts 5 reusable WhatsApp replies (hours, pricing, location) using AI.

3 Business Planning & Ideas

Tools:

OpenAI
ChatGPT

Google
Gemini

Notebook
LM

Used for:

Naming
businesses.

Writing simple
business
descriptions.

Clarifying target
customers.

Pricing ideas.

Example:

A sewing entrepreneur asks:
"Help me price school uniforms
in my town."

4

Accounting & Record-Keeping (Emerging)

Tools:

OpenAI
ChatGPT

Google
Gemini

Notebook
LM

Example:

Am I improving?

AI Assistant

Analysis: Yes, sales are consistently increasing by \$50 per week, indicating positive growth.

Used for:

Simple income/expense categories

Explaining profit vs cash

Monthly summaries

BBA Guardrail:

AI explains — humans decide and verify.

5 Training & Learning

Tools:

OpenAI
ChatGPT

Google
Gemini

Notebook
LM

Used for:

Learning how to sell

Understanding
customer service.

Learning new skills
(baking, repairs, digital
tools).

Example:

AI, how can I
improve my
customer
service?

AI Assistant

Analysis: Focus on active listening and personalized consultations. Offer a complimentary beverage, remember client preferences, and follow up at build loyalty.

Hiring & CV Help (Small but Growing)

Tools: Gemini, ChatGPT, Notebook LM

Writing simple job descriptions.

Improving CVs.

Preparing interview questions.

AI Role-Playing for Businesses

Role-playing with AI is powerful because it:

Works **100% on a phone**.

Requires **no literacy in business theory**.

Feels **safe** (no embarrassment).

Can be repeated **anytime**.

Builds **confidence** fast.

Why Role-Playing Outperforms Lectures

Role-Play (AI)

Very High

Discussion

Medium

Reading

Low

Lecture

Low

Most Common Role-Play Use Cases

1 Customer Service Practice (Most Popular)

Scenario:

"You are a customer upset about price."

Used for:

Handling complaints.

Explaining value.

Saying "no" politely.

Keeping customers.

Impact:

Entrepreneurs stop reacting emotionally and start responding professionally.

Most Common Role-Play Use Cases

2 Sales Conversations

Scenario:

"You are a customer deciding whether to buy."

Used for:

Opening conversations

Asking for the sale

Overcoming objections

Upselling

Example:

A food vendor practices how to suggest a drink or side dish.

Most Common Role-Play Use Cases

3 Pricing & Negotiation

Scenario:

"You are a buyer asking for a discount."

Used for:

Defending fair prices.

Avoiding underpricing.

Practicing calm negotiation.

Cultural Context:

This is huge in cultures where bargaining is common.

Practice Time

Business Scenario “Difficult Customer”

Background Information

Product: 5-gallon purified water delivery + optional dispenser rental/cleaning.

Customer: impatient, price-obsessed, constantly compares competitor.

Buyer's opening lines (pick 2–3):

- “The other water guy is cheaper and tastes better. What’s your best price?”
- “I don’t have time. Can you match their price—yes or no?”
- “They deliver faster. Why should I pay more with you?”
- “If your seal breaks or the bottle leaks, are you replacing it or not?”

Seller's rules:

- No competitor-bashing, no fake claims, no arguing.
- Stay calm, move from **price** → **value/risk/reliability**, and propose a **next step** in under 60 seconds.

Define your “truth-based differentiators”

Write 3–5 items that you can honestly offer (choose what fits your program):

- Delivery windows (same-day / next-day)
- **Seal + hygiene standard** (tamper seal, sanitation process)
- **Consistency** (taste, filtration steps)
- Leak/break replacement policy (clear terms)
- Dispenser cleaning/maintenance
- Business delivery priority / subscriptions
- Payment options (weekly/monthly)

Also determine:

- **Your current price** (or a sample price)
- Competitor’s claimed price (what the buyer says)

ChatGPT or Gemini Prompt

You are a sales coach for a large purified water delivery business in Nicaragua. Customer profile: price-oriented, impatient, keeps saying competitor is cheaper and higher quality. My offer: 5-gallon purified water delivery + [optional dispenser rental/cleaning].

My truth-based differentiators:

- [bullet 1]
- [bullet 2]
- [bullet 3]

My current price: [price]. Competitor claim: [price] and “better quality.”

Output:

1. A 20-second calm response that acknowledges price + reframes to reliability/safety.
2. 5 fast questions that expose the real need (delivery time, seal, leak policy, consistency).
3. A “value ladder” with 3 options: Basic / Reliable / Premium (include what’s in each).
4. Two close lines: “start today” and “trial delivery for one week”

Constraints: short sentences, WhatsApp-friendly, no made-up claims.

Share the AI responses that you received from this exercise.

Top AI Use Cases for Churches & Ministries

Sermon & Teaching Preparation (Most Common)

AI Tools

 ChatGPT,  Gemini,  Notebook LM

Used for

-  Sermon outlines
-  Illustrations and examples
-  Cross-references
-  Youth and children's lesson structure

GUARDRAIL

AI may
**assist structure, never
replace** Scripture study or
discernment.

Bible Study & Training Support

Tools:  ChatGPT,  Notebook-style tools

Used for:

Small-group
discussion
questions

Youth
devotionals

Leadership
training
summaries

Explaining dif-
ficult passages
(with verification)

Example:

A lay leader asks AI to turn a chapter into
5 discussion questions for a cell group.

Communication & Outreach (High Adoption)

Tools:  ChatGPT  Gemini  Canva  WhatsApp

WhatsApp
announcements

Event flyers
and posters

Social media
captions

Follow-up
messages
after services

Why this works:

Most churches already live
on **WhatsApp + Facebook.**

Translation & Language Help

Tools:  ChatGPT  Gemini

Translating
devotionals

Adapting outside
resources into
Spanish

Simplifying
theological
language

BBA Guardrail:

Translations require **pastoral review** before teaching.

Youth & Children's Ministry

Tools:  ChatGPT 

Used for:

Games and activities

Lesson ideas

Visual storytelling

Object lessons

Impact:

Keeps younger leaders engaged and confident.

Administrative Help (Quiet but Valuable)

Tools:

ChatGPT

Gemini

Google Docs

NotebookLM

Used for:

Ministry reports

Donor updates

Meeting summaries

Volunteer role descriptions

Example:

A pastor dictates notes → AI organizes them into a clean report.

Leadership & Conflict Role-Playing (Emerging)

Tools:  ChatGPT

Used for:

Practicing hard conversations

Conflict resolution

Counseling boundaries
(non-clinical)

Leadership decision clarity

This use is growing fast once pastors experience it safely.

Practice Time

Church Scenario “Sermon Prep”

Sermon Prep Research (Weak Prompt → Strong Prompt)

Scenario (everyone uses the same):

You're preaching this Sunday on **James 1:19–27** ("listen, speak, anger, doers of the Word"). Your audience is a **mixed congregation in Nicaragua** (new believers + mature believers). You need **research support + structure**, not a ghostwritten sermon.

Round 1: Use a WEAK prompt (on purpose)

Everyone paste this prompt:

Weak Prompt

Help me with a sermon on James 1:19–27.

How was the response?

Round 2: Use a **STRONG** prompt (copy/paste)

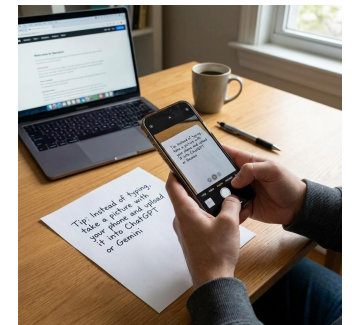

Strong Prompt

Act as a Bible study research assistant (not a preacher). Help me prepare a sermon teaching outline on **James 1:19–27** for a mixed congregation in Nicaragua (new believers + mature believers).

Requirements:

1. Give a **clear outline** with 3 main points and short sub-points.
2. Provide **key observations from the text** (context, repeated words, contrasts, commands).
3. List **5 cross-references** (book + chapter + verse) that truly connect to the passage, and explain in one sentence why each connects.
4. Give **2 real-life illustrations** suitable for Nicaragua (family life, work, market, community).
5. Provide **one application challenge** for the week and a simple closing prayer outline (3 lines).
6. Do not write a full sermon manuscript. Keep everything grounded in the passage. If uncertain about a reference, say so.

Tip: Instead of typing, take a picture with your phone and upload it into Chat GPT or Gemini.

Share the AI responses that you received from this exercise.

Practice Time

Ministry Scenario “Plan a New Ministry Segment”

Sermon Prep Research (Weak Prompt → Strong Prompt)

Scenario (everyone uses the same):

Your church wants to launch a new outreach segment called “Family Strength Nights” to serve families in the community.

Round 1: Use a WEAK prompt (on purpose)

Everyone paste this prompt:

Weak Prompt

Give me ideas for a new ministry.

How was the response?

Round 2: Use a **STRONG** prompt (copy/paste)

Act as a ministry program planning assistant for a church in Nicaragua. Help me brainstorm and plan a new ministry segment called **“Family Strength Nights.”** Context: Our church has limited budget, mostly volunteers, and we want something simple but consistent.

Most families use WhatsApp; many are first-time visitors to church.

Audience: parents (20–45) with children (5–14).

Constraints:

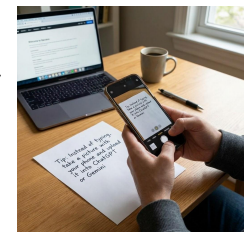

- Runs 2 times per month (Saturday evenings)
- 90 minutes per session
- Budget: \$40 per event
- Volunteer team: 6 people
- Location: church courtyard/classroom

Output required (use clear headings):

1. **One-sentence mission statement**
2. **3 measurable goals** (simple metrics we can track)
3. **Program format** (minute-by-minute agenda for 90 minutes)
4. **Volunteer roles** (6 roles with responsibilities)
5. **Materials list** (low-cost)
6. **A 4-week launch plan** (week-by-week tasks)
7. **2 WhatsApp invitation messages** (Version A simple; Version B energetic with emojis)

Guardrails: Keep it culturally appropriate for Nicaragua, avoid manipulation or guilt language, and keep it realistic for volunteers.

Tip: Instead of typing, take a picture with your phone and upload it into Chat GPT or Gemini.

Share the AI responses that you received from this exercise.

Notebook LM

The Game Changer

What Do You Get **For Free?**

**Currently, NotebookLM is 100% Free
with a Google Account.**

Unlocking advanced research and analysis without cost.

THE GAME CHANGER

Why is everyone talking about NotebookLM?

ZERO HALLUCINATIONS

It only answers from YOUR data.
It doesn't make things up.

MULTIMODAL

It reads PDFs, Slides, Websites,
and Text simultaneously.

PRIVATE

Your data stays in your notebook.
It is not used to train the public
model.

NotebookLM: Feature Overview

Sources

Upload almost anything

Chat with Sources

Discuss your data

Audio Overviews

Podcast-style deep dives

Briefing Doc

Instant executive summary

FAQ Generator

Customer service scripts

Suggested Questions

Cure for Writer's Block

Study Guides

Quizzes & Glossaries

Timeline

Historical ordering

Saved Notes

Pinning insights

Language Support

Multilingual expert

Video Overviews

Explainer videos

Mindmaps & Infographics

Visualize & present content

FREE ALLOWANCE LIMITS

NOTEBOOKS

Up to **100**
separate
notebooks.

SOURCES PER NOTEBOOK

Up to **50** sources.

SIZE PER SOURCE

Up to **500,000** words
(or 200MB PDF).

AUDIO OVERVIEWS

Unlimited
generation.

Feature 1: Sources

The foundation of your notebook. You can mix and match.

Files

PDFs, Google Docs, Slides.
(Manuals, Sermons, Contracts)

Web

Paste a URL. It reads the
text (no paywalls).

Text

Copy text from WhatsApp or
Notes and paste directly.

NotebookLM

Feature 2: Citations (Trust)

This is the #1 reason to use NotebookLM for serious work.

| NotebookLM Answer | Original Source Document |
|--|---|
| The company's revenue grew by 20% in Q3 [1]. | <p>Our Q3 financial report indicates a 20% increase in total revenue.</p> |

Why it matters

If you are quoting a price or a Bible verse, you cannot afford to be wrong. **Citations. Citations prove the truth.**

Feature 3: Audio Overviews

The “Magic” Feature.

It takes your dry documents (like a 50-page PDF) and turns them into a lively “Radio Show” conversation.

Two AI hosts (male/female) discuss, joke, and use metaphors to explain your content.

Deep Dive: Customizing Audio

You are the Director. You can tell the hosts what to focus on.

Before clicking 'Generate',
click 'Customize':

"Focus this discussion on the
marketing budget for Q4.
Explain it to a 10-year-old."

"Debate the pros and cons
of this new policy."

"Create a Spanish summary
of this English text."

Audio: Ministry & Biz Use Cases

For Pastors

Upload your sermon transcript. Ask for an audio summary to share with the congregation on Monday.

For Entrepreneurs

Upload a complex legal contract. Listen to the hosts discuss “Risk Factors” while you drive to the meeting.

Feature 4: The Briefing Doc

The "Cheat Sheet".

As soon as you upload a source, NotebookLM creates a **"Source Guide"**.
Click it to get up to speed in seconds.

Key Themes Summary

Key themes summary thrrn
notebookLM, content, and
sedden discitinner.

Main Arguments

Main arguments and main
complete to theirlocal and
competition.

Cast of Characters (if applicable)

Cast of bokef and cast of
characters and applicable))
masuling profit.

Feature 5: Suggested Questions

Cure for Writer's Block.

Sometimes you don't even know what to ask. NotebookLM reads your file and offers 3-5 smart questions to get you started.

“What are the safety risks listed in the manual?”

“Compare the pricing strategy to 2024.”

Feature 6: **Study Guides**

Turn any **document** into a **Classroom**.

Quiz / Exam

Generates multiple choice or short answer questions based on the text.

Glossary

Extracts difficult terms and defines them.

Essay Topics

Suggests deep questions for reflection or preaching.

Feature 7: Timeline & TOC

Timeline

Extracts dates and events.
Perfect for studying the Life of David
or reviewing a Project Schedule.

Table of Contents (TOC)

Even if you upload 20 messy text files,
it creates a unified TOC so you can
navigate your knowledge base.

Feature 8: Deep Research (NotebookLM)

What it is

- NotebookLM is a source-grounded research notebook: you load your materials and it answers questions and creates study artifacts grounded in your sources, with citations/guardrails for verification.
- It can also pull in relevant web materials via Discover Sources (built-in web finder) so your notebook becomes a curated research pack.

Feature 9: NotebookLM Video Overviews

What it is (why it's powerful)

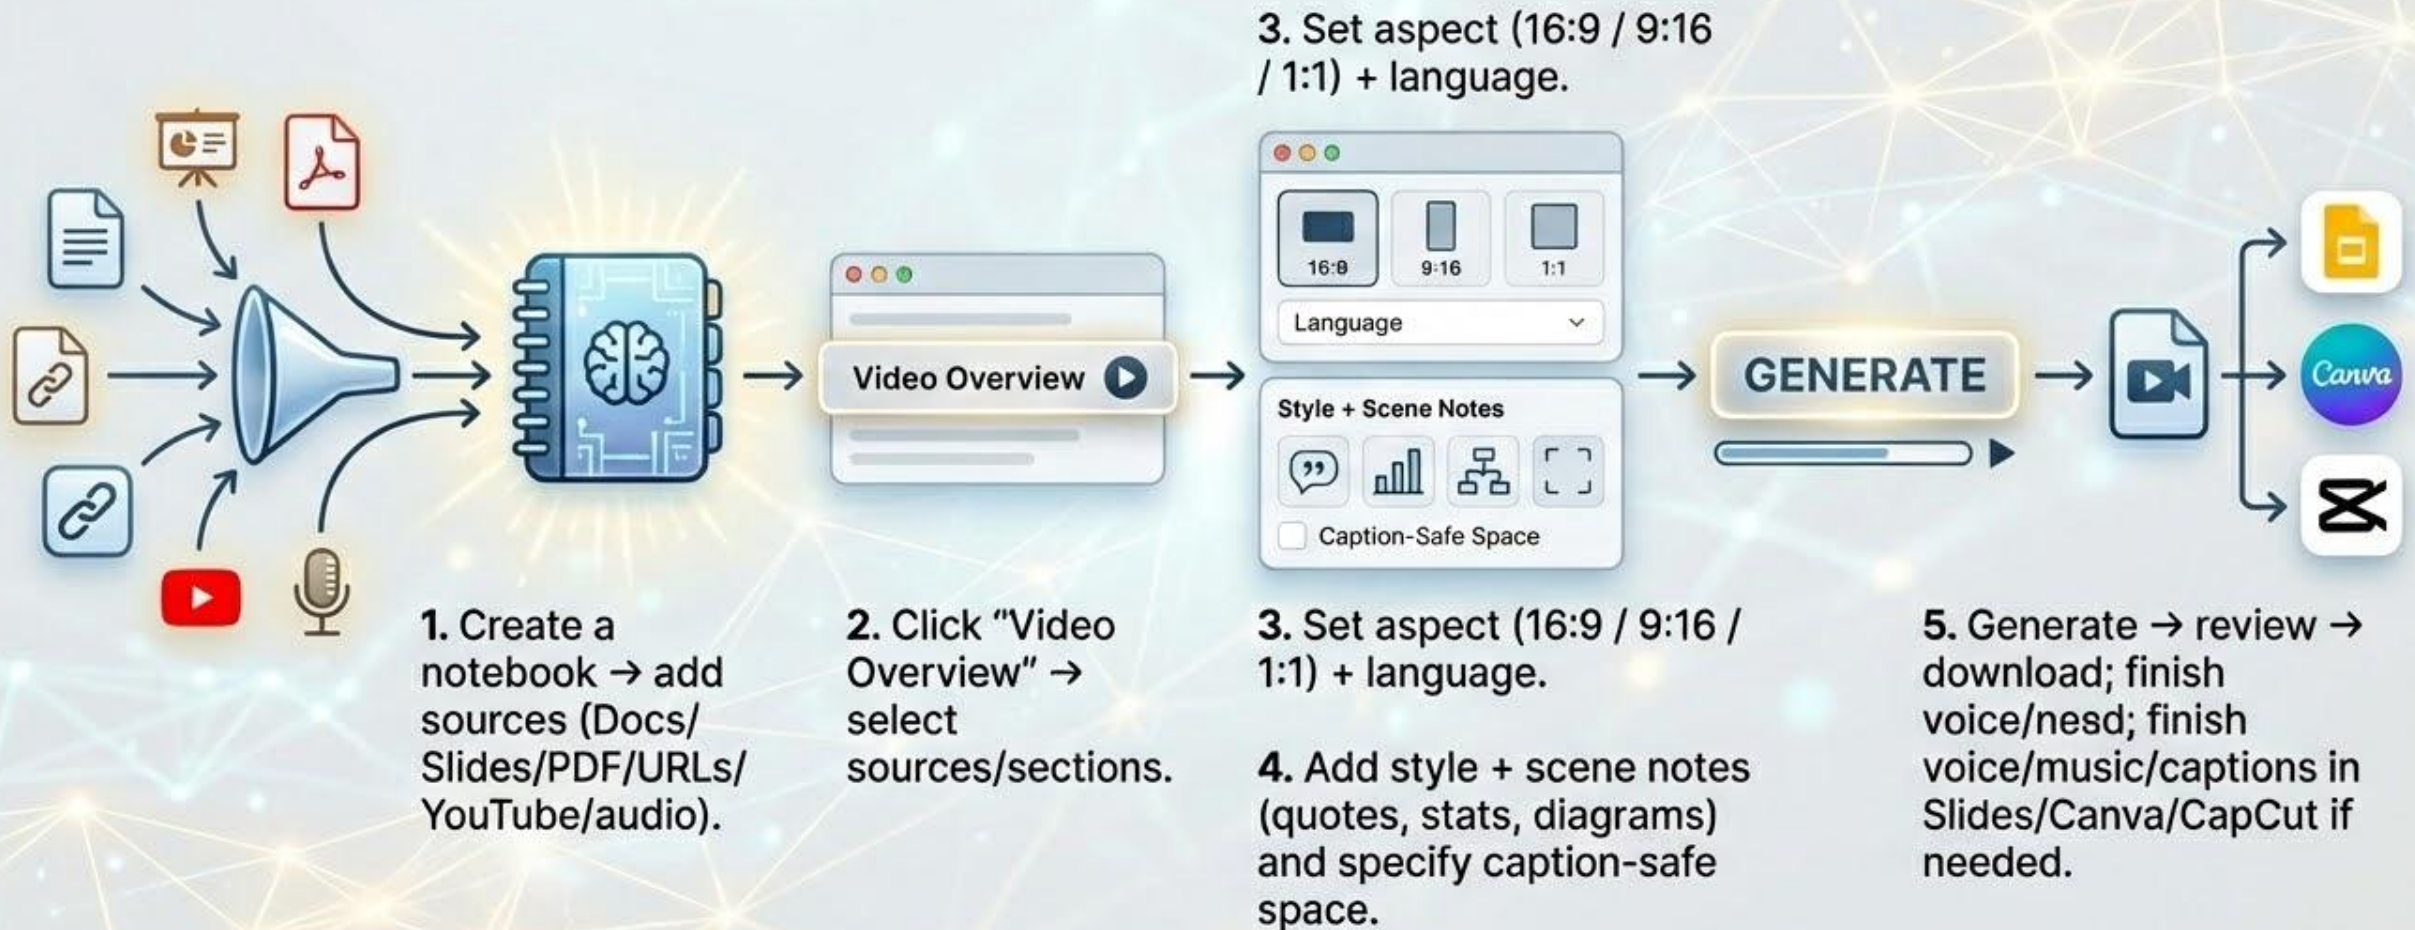

- NotebookLM creates **Audio/Video Overviews** that explain your uploaded materials in natural language—source-grounded for fast training + teaching prep

Ideal for turning policies, lesson packets, and SOPs into quick video explainers for:

- Staff, volunteers, students, and pastors.

How to generate a Video Overview (30–60 seconds)

Feature 10: Sharing & Permissions

NotebookLM is built for collaboration.

Viewer Access "Read Only"

Great for sharing manuals with students or volunteers who shouldn't change the data.

Editor Access "Collaborate"

Great for leadership teams working on a shared project.

Public Link "Publish"

Create a public URL for your Audio Overview or Briefing Doc to share on WhatsApp.

Feature 11: Saved Notes

Synthesis Mode.

When the AI gives a great answer, click the **Pin icon**. It saves it as a **card**.

You can select multiple cards and ask NotebookLM to:

"Combine these notes into a single email."

Feature 12: Language Flexibility

It is your Multilingual expert.

English → Spanish

Upload an English manual.
Ask questions in Spanish.
It answers in Spanish.

Spanish → English Audio

Upload a Spanish document.
Generate an English Audio
Overview to practice listening.

Feature 13: Analytics

Who is reading your notebook?

VIEWS

How many people
opened it.

ENGAGEMENT

How long they
stayed.

SHARES

How often it was
forwarded.

When you publish a Public Link, NotebookLM provides insights into the traffic.

Use Case: The Pastor's Library

Goal: Sermon Prep.

- Create Notebook: "Sermon Series: Ephesians".
- Source 1: PDF Commentary on Ephesians.
- Source 2: Your previous notes.

Action: "Generate a 3-point outline for Ephesians 4 focused on Unity."

Use Case: The Entrepreneur

Goal: Market Research.

- Create Notebook: "New Product Launch".
- Source 1: Link to competitor's website.
- Source 2: Link to competitor's Facebook page.

Action: "Create a Briefing Doc comparing their pricing to mine."

Access our AI Portal

Our Portal contains
